Journal 1

I created a simple scene with a player-controlled cube. I wanted my scene to be something that wasn't just a plain background or plain old blocks. I went to the Unity Asset store and downloaded a few asset packs to get me started. So, the scene I have is of a forest landscape with my cube in the middle of it. I also have a nice sunny day as my skybox texture to make it look even nicer. I do have more assets up my sleeve that I plan to use if I am to keep using this project.
